HubSpot product updates - Here's what's hot 📰

HubSpot's new deal properties 🆕

HubSpot has introduced Deal Stage Calculated Properties.

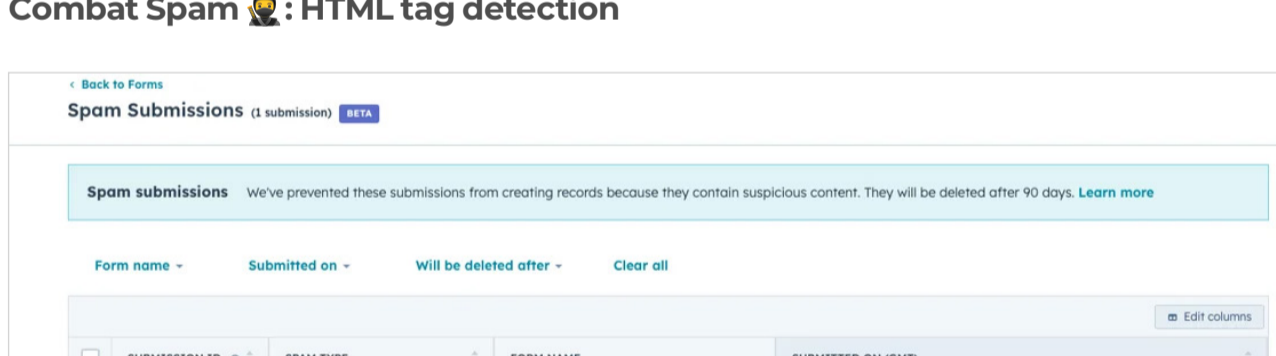

Professional or Enterprise clients get access to four new HubSpot-defined deal properties, including Date entered {stage id}, Date exited {stage id}, Latest time in {stage id}, and Cumulative time in {stage id}.

These properties help identify sales process bottlenecks and gauge deal pipeline velocity. They automatically update as deals progress and can be utilized to review property history, enhance reporting, and incorporate properties into automated workflows.

This update is available to clients with CMS Pro, CMS Enterprise, Marketing Pro, Marketing Enterprise, Ops Pro, Ops Enterprise, Sales Pro, Sales Enterprise, Service Pro, or Service Enterprise plans.

Combat Spam 🛡️: HTML tag detection

HubSpot has updated the Spam Submissions tool under Forms.

Now, submissions with HTML tags in the first or last name contact properties will be flagged as spam and isolated. This ensures data quality and safeguards against phishing attacks or spam data, streamlining the process for marketing teams.

These submissions will be automatically categorized as "HTML in Name Field" spam type and can be reviewed in the Spam Submissions tool. Note that any submissions marked as spam will be automatically deleted after 90 days.

This enhancement applies to all hubs and tiers.
